THE ECLECTIC MAGAZINE, "The Cream of European Journalism"

THE ECLECTIC MAGAZINE of Foreign Literature aims to present to its readers a complete survey of the whole field of British Periodical Literature, compraising the selection of all the articles of the most able and celebrated Reviews, Magazines and Journals, which have any interest or value to American readers. It not only contains the astroles which are desirable in those periodicals reprinted in this country, but in the far greater variety of able and popular Reviews, Magazines, i.e., which form so splendid as element of the literature of the day, and which are inaccountly to the mass of American readers, except by some such medium as the Eclectic Magazine. The ample size of the Eclectic Magazine must be superior to those of any one, however great or celebrated; and taken together, must constitute a more destrable and able body of periodical literature than can be found elsewiere in the same compass. The work forms a valuable addition to any library.

senseless transaction that ever a ninny was guilty of; and when it is considered that the house upon which both of these checks were drawn were within balf a stone's throw of the "Trust Company," it seems simpest was countable that not the slightest demonstration was made toward ascertaining and calling attention to these papers—now they want us to pay for it.

the slightest demonstration was made toward ascertaming and calling attention to these papers—now they want us to pay for it.

We learn that the Bank's lawyers are tumbling over their musty volumes to find "analogous cases." a proceeding about as rational as sending for another lot of "Siamese twins." It is quite possible we may be "lamesd" out of the money: but no similar "case" case be found since the days of Solon, and there will never be another like it: "none but itself can be its parallel."

As much as we should distike to lose \$7,500, we are free to confess that we would far sooner meet the case, and wipe to qut, than make that sum off our neighbors in that cay. Endeavoring to establish and sustain an upright business reputation, we should feel our claim to such a character, in that event, considerably shaken.

It has occurred to us for some time past, that this concern is managed quite differently from what it would be if the owners were the managers—be it well or not, however, we presume the salaries are promptly drawn, and that is the matter that most nearly concerns the parties here; we now take leave of them, advising that we have handed our claim over to be "put through."

HARDWARE.—For Sale, a valuable and \$20,000, together with the privilege of leasing a first-rate Store, eligibly located for such a business. The same has been conducted during the last twenty years, and is owned solely by the advertiser. For persons desirous of going into the fiardware business, no better opportunity may present itself. For further particulars address Box No. 2,138 Post-Office.

DENCE IRON COMPANY, to close a concern, offer for sale their very extensive and complete establishment for manufacturing Iron, situated on tide water, at Fox Point, in

place and bars per day.

Connected with the above is a Wire Mill, capable of running eight time of roots per day, for which there is a regular and increasing demand in Providence, at the present moment, at least equal to the entire production of the mill.—Also, Revnoldis's Parent Wrought Spike and Nail Machines, which will turn out ten tuns per day. Also, a Cur Nail Mill, capable of turning out 180 to 173 casks per day, and which could be easily arranged to double that product.

As this establishment was built for use, no expense was spared in having everything about it of the most perfect kind, and the inventory exhibits as complete an establishment, perhaps, as is to be found in New England.

It is thought that no place in the United States presents a better opening for the successful prosecution, by a practical man, of the manufacture of wire rods, iron, nails, and spikes, than the City of Providence, the enter of a large and rapilly increasing manufacturing district, requiring for consumption the entire production of these works.

These works being on tide water, where the largest class of vessels which frequent our bay can lead and receive carroes without higherage, allows of their receiving their supplies of coal and iron at the lowest rate of freight; and lafter can st all times be had on as good terms as elsowhere in New England.

As it is supposed the purchaser would desire to examine the premises, further description is deemed unnecessary. The property will be sold cheap, and the terms of payment will be made easy.

For an examination of the property apply to Mr. W. H. HENDERSON, on the premises, and for terms an application may be made to either of the subscribers, in Providence.
